LOCAL NEWS

Zebras Spotted In Fairmount Par

Local medical students from the Hahnemann University School of Medicine reported a zebra sitting today in the Strawberry Mansion section of Fairmount Park. The students were enjoying the first days of spring here in the park when they suddenly heard hoofbeats. The students looked up expecting, as they were trained (gang!), to see horses but instead were astonished to see zebras. They were told by clinical professor S. Benham Kahn, M.D. that they probably never would. Dr. Kahn could not be reached for comment.

Remember all those nights when
you thought you were really funny?
You weren't.

Thanks to the efforts of Dr. Vince Zarro, AA has agreed to come to HU to teach future clinicians about the warning signs of alcohol abuse.

gender identity and transvestitism,

the truth about aphrodisiacs, . . .

STUDENTS RALLY IN THE STREETS . . .

The intersection of 15th and Vine Sts. had often been the brunt of jokes among the students at Hahnemann University. "Did you see the one last night?", was a familiar refrain. The students had become desensitized by the frequency of motor vehicle accidents occurring at the corner, most often due to a driver on Vine St. making an illegal right turn onto 15th. But on the morning of October 27, 1995 the students were no longer joking. Instead they were gathered in force at the intersection demanding action from the city to improve traffic safety at 15th and Vine. Less than twenty four hours earlier, Dr. Suzanne Zarro had been struck by a car involved in the above type accident, while waiting to cross the street.

The Hahnemann community rallied once again at the intersection on January 30, 1996, as part of "the enforcement blitz", a week-long effort by the city to enforce traffic safety rules. Police were stationed on the corner, ticketing motorists and pedestrians alike for breaking the rules. As a result of the student effort: traffic signals have been changed from solid green to directional arrows, cross walks and arrows on Vine St. have been re-painted, numerous traffic warning signs have been posted within a two block radius, and plans are underway for making Spring St. a two way street. Meanwhile after a stay in the ICU and at Magee Rehab (neither of which stopped her from calling Bev to give orders!), Dr. Zarro has returned to her place among the students who love her so much.

FROM THE EDITORS' DESK:
Well, this is the end of the line . . . the last page to be laid out before the Match. These four years have been filled with excitement and anxiety; hard work and frustration; struggle and play; life-altering decisions and events, both happy and sad; an overwhelming expanse of knowledge; and now with an all-encompassing sense of expectation. We have grown from this experience and we take to our appointed positions a bit of those who have surrounded us . . . those who taught us and those who shared with us our victories and our defeats. This book represents our times here at Hahnemann. We hope you enjoy these memories as much as we've enjoyed bringing them to you. Peace.

WEEKEND CLASS OF 1998

The second year students take advantage of a variety of weekend activities. For those of us who have forgotten what it is like to have a free weekend, let's take an in depth look.

Those who are overzealous in their activities get carried to HUH ER for appropriate treatment.

MASS EXODUS

Students often leave Stiles in their second year, despite Best of Philly Award. But here are ten reasons to stay:

10. The pleasant staff.
9. Beautiful architecture.
8. Saturday night roach races.
7. Room 501.
6. The great view.
5. Cheaper than Trump Towers and just as nice.
4. Stumbling distance from Westy's
3. No need for alarm clocks, construction wakes you up at 6:00 am.
2. 4:00 am. fire works courtesy of the drunk Inquirer guys.
1. Good experience treating MVA's on Vine St.

The weekend's a perfect time to catch up with Paris's latest fashions.

FOOD AND FINE DINING

Westy's on 15th St. has much to offer, here are the top ten attractions:

10. Your favorite classmates "singing" Karoake.
9. The world's most original pick up lines.
8. Free second hand smoke with each pitcher.
7. Skin flicks every weekend.
6. Drink with the Inquirer employees.
5. $5.99 E. Coli Burgers.
4. The beautiful decor.
3. The intellectual atmosphere.
2. Valet parking.
1. Dr. Haroian's office hours.

Lessons Learned

ever lose your capacity for enthusiasm.
ever lose your capacity for indignation.
ever judge people. Don't type them too quickly; but in a pinch never first assume that a man is bad; first always assume that he is good and that at worst he is in the gray area between bad and good.
ver be impressed by wealth alone - or thrown by poverty.
you can't be generous when it's hard to be, you won't be when it's easy.
e greatest builder of confidence is the ability to do something - almost anything - well.
hen that confidence comes, then strive for humility; you aren't as good as all that.
d the way to become truly useful is to seek the best that other brains have to offer. Use them to supplement your own, and be prepared to give credit to them when they have helped.
e greatest tragedies in world and personal events stem from misunderstandings. Answer: communicate.

Cheer up the tired and lonesome,

Where shadows fall the darkest,
  May thy rays of brightness reach.

Go forth to teach salvation,

Go forth to all the nation

Hahnemann Increases Primary Care Exposure

tudents attending Hahnemann University School of Medicine are expanding their family edicine interest group and community outreach plans with a local start-up grant from MSA's Generalist Physicians In Training (GPIT). Nanci Yuan, coordinator of the local PIT chapter, is aiming to give students wider exposure to generalist careers through mmunity outreach projects, and to possibly incorporate these projects into curricular hanges at Hahnemann.

■ Encouraging her fellow students to consider careers in generalist medicine has earned **Nanci Yuan**, second-year medical student, a national award from the American Academy of Family Physicians (AAFP).

Last fall, Yuan co-founded the School of Medicine's Primary Care/Family Medicine Interest Group with C. Roger Turk, second-year medical student. The group gives medical students early introduction to careers in general internal medicine, general pediatrics, family practice or other generalist disciplines.

Since then, membership in the group has surged to more than 150 students, a faster rate of growth than any similar group in other medical schools across the nation. The AAFP recognized this achievement with two awards at its annual meeting: one for Ms. Yuan and one for the entire group.

Dear **Kent (aka Chey)**,

We cannot find the words to express how proud we are that you are graduating medical school. As if that isn't enough, of greater achievement is the fact that you, Lisa, and Savannah have survived living four years in Philadelphia. For the former, you deserve a diploma... for the latter, your wife and canine deserve a Distinguished Service Cross. Your desire to play doctor since you enteredpube · was a clear indication of your destiny to become a physician... whether licensed or not. Our technical support in reminding you that the "knee bone is connected to the thigh bone", etc., has been invaluable in helping you pass your medical exams...and for this we know that you are eternally grateful. Congratulations, you made it!!! We love you!!!

♦ With love, Mother and Dad Sigal

> "Thus we see that the all important thing is not killing or giving life, drinking or not drinking, living in the town or the country, being lucky or unlucky, winning or losing. It is how we win, how we lose, how we live or die, finally, how we choose. Living in this world means choosing, and the way we choose to walk is infallibly and perfectly expressed in the walk itself." --R. H. Blyth

I can't believe that four years have passed since I met the Class of 1996 and began my own journey at Hahnemann University. We have grown together, through crises and parties and anxiety and joy--I have watched you evolve into caring, committed physicians; you have taught me a great deal about myself. It breaks my heart not to be with you on May 31st--to see each of you cross that stage and accept the diploma and the degree that you so deserve, to see you don your caps and gowns and move forward in your lives. But from my home in Malawi, Africa, please know that I will be thinking of you on that long-awaited day, and I will send my good wishes and positive karma your way. Remember that you are always welcome in my home--I'll have a mat in my mud hut waiting for each of you.

With love to the Class of 1996--

Kathy Callahan
